

Measurement Period: January 1, 2023 through December 31, 2023 **GTS** has managed **2,946,692.00 lbs** of electronics from all Vendors

2,946,692.00 lbs of used electronic equipment for Reuse and/or Material Recovery

By extending the life and recycling electronics

4,107,366.13 lbs

of GHG emissions were reduced

This is equivalent to removing:

989.00 passenger cars from the road per year

This GHG reduction includes

37,143,884 kWh

The prevention of electricity being used

This is equivalent to:

2,908.00 U.S. Household(s) annual electricity consumption

By extending the life and recycling 2,946,692.00 lbs of electronics, GTS was able to prevent the additional mining of the following metals thereby reducing the demand for extracting these materials once more.

75.29 lbs
Gold

30.34 lbs
Palladium

5.75 lbs
Platinum

60,305.85 lbs
Aluminum

804,564.87 lbs
Steel

130,181.20 lbs
Copper
